

Mohamad Shaari, DatumCorp's Chief Operating Officer. Little did the 48-year-old realise the enormity of the task that he had to undertake.

The powers-that-be at PKNS headquarters in Shah Alam, however, were confident of their selection. Shytul had last served with the Urban Development Authority (UDA) from 2004 until 2012, where he was the Chief Executive Officer of the Property Development Division, responsible for spearheading the development of high-value mixed commercial and residential projects in urban areas and township development. His past exposure is now effectively working through Datum Jelatek.

Datum Jelatek offers a splendid option of four towers comprising 706 residential units and a 4-storey retail mall. Each tower sports its own identity, with unique design elements. Unit build-up sizes range from 550 sq ft to 1,600 sq ft, and each unit is crafted to exert the imagery of luxury and sophistication yet maintaining the importance of comfort.

Important to residents are the very generous car park allocations of between two to four car parks, depending on the size of the units.

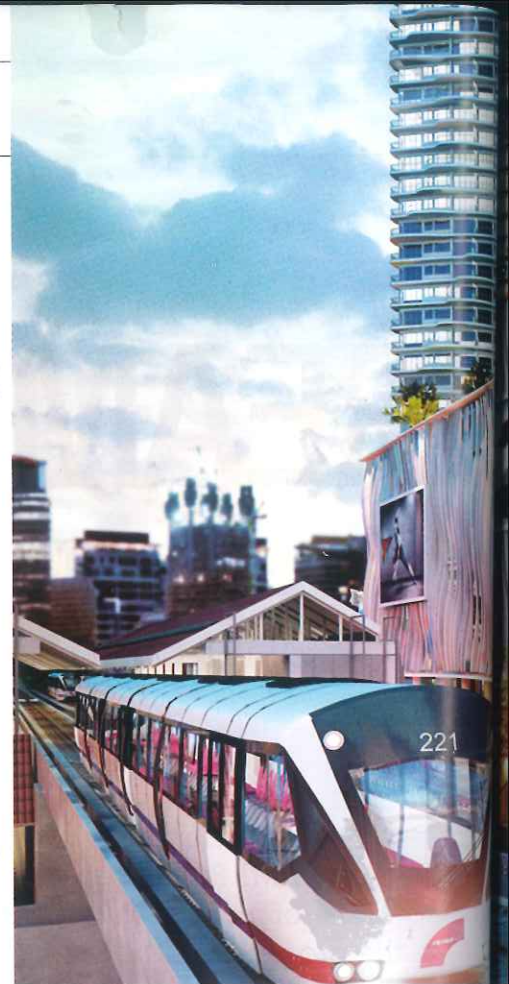

This is viewed as being unique because in almost all projects in Kuala Lumpur, only one car park is allocated, and in some cases, residents are reduced to renting the space.

Aside from that, Levels 11, 27 and the Rooftop are considered the three levels with lavish facilities, where residents will not only have an adoring view of the city but will also enjoy fireworks during festivals at their doorsteps.

Equally sizzling to residents would be the availability of a rock climbing studio, a fully equipped audio and games room, a mini putting green, alfresco dining, a reading alcove, gyms, and a BBQ area – all with a feeling of being at the top of world.

Prospective residents can make a selection between a generously sized studio, one-bedroom, two-bedroom and three-bedroom suites. With all other essentials of contemporary living provided by the management, it demonstrates the desire to serve the residents' best interest. Datum Jelatek is a class of its own, promising potential owners an unforgettable experience in luxury living.

And let's not forget the mall on which all four tower blocks stand. This

**Top left:** The Mall with a strong retail base is an added boost to the project.

**Top right:** The LRT connectivity factor will serve as a crucial to the residents in their daily travels.

**Below:** Its landscape and innovative architectural designs are set to sustain an eco-friendly environment.
